

# HuLoop Intelligent Process Automation

Automate and Optimize Your Business with Intelligent Agents

## Simplify the Way Work Gets Done

Your team is buried in manual tasks, disconnected systems and clunky processes. Intelligent Process Automation (IPA) uses AI-powered intelligent agents to take over repetitive work — so your employees can focus on work activity that adds value.

### Automate the Repetitive, Empower the Human

### HuLoop Helps Eliminate:

- ✓ Repetitive, manual busywork
- ✓ Human errors and inconsistent handoffs
- ✓ Fragmented systems and data silos
- ✓ Process inefficiencies and compliance gaps
- ✓ Quiet quitting, burnout and high attrition

# Automate and Optimize Across Your Business

Intelligent Process Automation can:

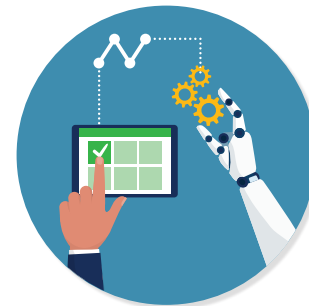

Deploy intelligent agents that work 24x7—no breaks, no burnout

Automate across legacy, cloud and everything in between

Eliminate manual steps across teams, tools and departments

Add human-in-the-loop governance where it's needed

## Key Benefits

### Boost Productivity by 30%

Free up your workforce for high-impact, strategic tasks.

### Streamline Operations

Speed up processes by 40-60% with cross-system automation.

### Enhance Accuracy

Reduce costly human errors and eliminate risky workarounds.

### Cut Operational Costs by 20%

Let automation handle what shouldn't be done manually.

### Unify Systems, People and Data

Bridge gaps between tools and teams with intelligent agents.

### Human-in-the-Loop Ready

Use logic rules, human oversight — or both.
