

HuLoop

Human-in-the-Loop Intelligent Automation

Simplify Processes, Automate Mundane Tasks,
and Improve Productivity

Introducing BeatBlip, AI Powered Intelligent Automation

A growing number of organizations trust HuLoop's BeatBlip to address the most daunting automation challenges, and release quality applications faster and more confidently. BeatBlip's Automation solutions include the following:

Business Process Automation (BPA)

Orchestration of complex business processes, across disparate systems.

Robotic Process Automation (RPA)

Build, deploy, and manage software robots that emulate human actions.

Business Process Automation (STA)

Control and execute repetitive tests and verify expected outcomes.

Automation as a Service (AaaS)

Our Experts provide a low stress implementation, maximizing ROI.

BeatBlip's Key Benefits

All-in-one Solution

Seamlessly automate test and business processes spanning across diverse systems (web, mobile, desktop, packaged apps, and data sources).

Seamless Integration

Integrates with existing systems and sub-systems and provides visibility to process execution reports.

Rapid and Codeless Automation

Rapidly automate complex test and business processes, end-to-end, without writing a single line of code.

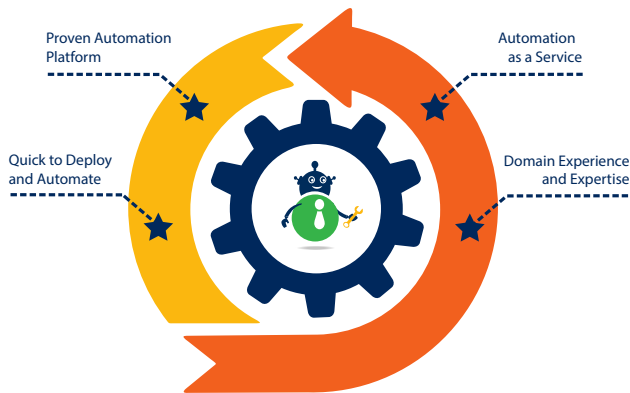

Technology Agnostic

As a technology and platform agnostic solution, BeatBlip can be hosted or run on any operating system including Linux.

BeatBlip

Why HuLoop?

Proven Automation Platform

- More Than **250,000+** Processes Automated

Quick to Deploy and Automate

- Easy to Maintain and Change
- Best-in-Class Training and Support
- Easy to Learn and Use

Domain Experience & Expertise

- Up to **~50%** Reduction in Costs
- Up to **~90%** Improvement in Productivity

Why Is Human-in-the-Loop Intelligent Automation Better?

AI-based automation is...

- Faster, more accurate, and rational.
- It can replace mundane, boring, repetitive tasks.
- It can improve productivity and job quality.
- Over the long run, automation mostly transforms rather than eliminates human jobs.

AI-based automation is not...

- Intuitive or culturally sensitive.
- It can't replace strategic thinking, emotional intelligence, or empathy. It's not creative or imaginative.
- Humans can understand and interpret a given situation and respond accordingly.

About HuLoop Automation

Based in the Sacramento, Calif. area, HuLoop Automation, Inc., helps enterprises realize maximum value from their people by keeping humans in-the-loop during intelligent automation, as well as ungoverned automation. The innovative AI-powered automation company was built to accelerate the growth of the low-code/no-code BeatBlip platform.
