

# QuickApp Builder

Turn Data Collection into  
Executed Work

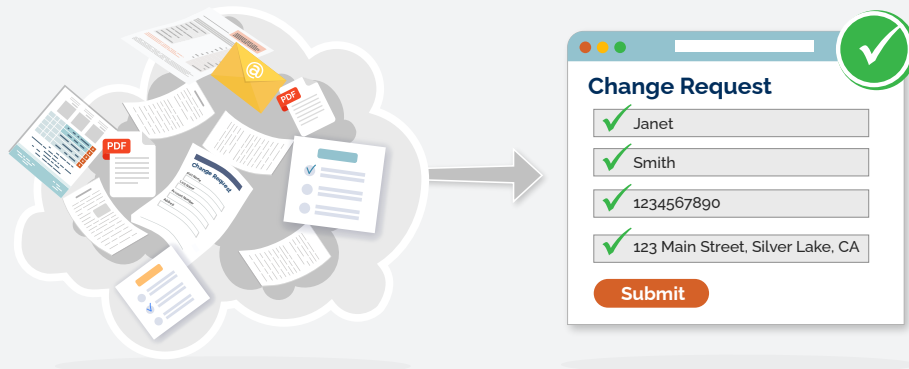

## Stop Managing Forms. Start Getting Work Done.

Your business runs on forms, spreadsheets, PDFs, and disconnected data collection. Information gets captured, reviewed, and manually passed along, creating delays in how work moves through your organization.

HuLoop's QuickApp Builder transforms those inputs into intelligent micro-applications that collect, validate, and trigger action instantly — so processes move forward without delays or manual handoffs.

### Forms Don't Drive Your Business. Work Does.

*Build applications that validate, route, and execute work.*

### HuLoop Helps Eliminate:

- ✓ Static forms and paper-based processes
- ✓ Manual data entry and follow-ups
- ✓ Inconsistent or incomplete data
- ✓ Delays between submission and execution

# Input. Execute. Instantly.

With HuLoop's QuickApp Builder you can:

## Build Apps in Minutes

Create branded micro-apps, no development required.

## Digitize Any Process

Convert forms and workflows into structured, validated experiences.

## Trigger Action Instantly

Route submissions, update systems, and notify stakeholders in real time.

## Guide Users Intelligently

Dynamic logic shows only what's relevant based on each user's inputs.

## Key Benefits

### Intuitive Experiences, Every Channel

Guide interactions across digital and on-site, for customers and employees.

### Capture Clean Data at the Source

Complete, validated information collected at the point of entry, every time.

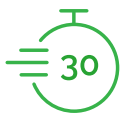

### Eliminate Manual Work

No more data entry, paper handling or follow-ups slowing your team.

### Automatically Execute Work

Every input triggers the next step — approvals, system updates and workflows included.

### Deploy in Under 30 Minutes

No-code simplicity gets your micro-apps live fast.

### Works with Your Existing Systems

Connect to SQL, APIs, core systems, CRMs and ERPs — no rip and replace required.
